## Leather Colour Matching Form: Colour Repair Kit

### IF YOU DO NOT KNOW WHERE TO GET A SAMPLE OF LEATHER FROM READ THIS

**For Furniture:** Turn your sofa onto its back and you will find a base cloth stapled to the framework. Using a knife or other pointed object such as a screw driver, pluck several staples out so that you can peel back the cloth. Doing so will reveal an over hang of leather. If you cannot remove any staples, the only other place is to un zip a cushion and cut some from the seams.

**For Cars:** Just feel under the seat and cut a piece off anywhere you can. All cars are trimmed differently and so it is hard to say any one specific place to look. You can always send a panel or headrest if you cannot cut a sample off.

**ABOUT THE SAMPLE:** A sample of leather should be bigger than a 5p. The bigger the sample the better we can match it. If you can only cut off a small piece of leather then send us as many small pieces as you can.

**DO NOT** stick the sample to the paper on the finished side of the leather, always stick to the suede side. Or attach the leather with a staple, paper clip or leave it loose.

Please fill in the below details.
